Voltage & Lamp

120/240 Volt with HPS Lamp -

These lights are the middle ground between quality, performance, and cost effcacy. I have many out in the field with excellent feedback.

According to the manufacturer of Current culture and Sun system you will need 16 of these for optimal lighting conditions, that being

said, if budgeting is a concern You can get by with just 9

Alternatively if this is way out of budget I have other lighting

types and brands we can get for cheaper. Just let me know your thoughts

Please give me a call when you have a chance to go over your lighting options with me.
